

# The enterprise AI platform for all your company's data.

Glean generates the answers you need to do your best work and automate daily tasks.

The work we do is more complex and fast-moving than ever before. Amidst the many applications you work with, finding the answers you need quickly is becoming increasingly difficult. Furthermore, connecting to all work data is hard, let alone understanding how it all connects. Answers need to be sourced from coworkers, Slack or Teams conversations, Jira tickets, emails, and more.

That's why we created Glean. Glean is the enterprise AI platform that connects with and understands all your company's data, enabling you to find the knowledge you need to do great work—and even automate many of your daily tasks.

## Trusted answers grounded in enterprise data

- Our knowledge graph connects all your content, people, and daily activities.
- Deeply personalized answers tailored for each user and their workflow.
- Glean's Retrieval Augmented Generation ensures LLMs always have the right data.

## Build your own enterprise AI speedily and securely

- Create personalized AI agents, assistants, and chatbots—no code needed.
- APIs that enable trusted AI experiences anywhere they're needed.
- Always secure, private, permissions-aware, and referenceable.

## Turnkey deployment of a complex ecosystem

- 100+ connectors enable easy implementation. No professional services, data training, or fine-tuning needed.
- You choose which LLM to use. Avoid getting locked into one model.
- Scalable infrastructure ensures data sensitivity amidst growth.

## About the company

Glean was founded by a world-class team of engineers from Google and Facebook who wondered just like you – why don't we have an easier way of finding what we need at work?
